What I Do

I build production-ready apps in days, not months — using an AI-assisted development workflow.

Solidity smart contracts, DeFi protocols, RWA tokenization, AI agents, Telegram bots, SaaS.

Core Focus (2026)

🏠 RWA Tokenization — real estate & asset tokenization (AIRealty, Solidity RWA contracts)

🔗 DeFi & Smart Contracts — ERC-20/721/1155/4626/6551, Staking, DAO, Escrow, Bridges

🤖 AI Agents & LLM Systems — autonomous agents, RAG, Mistral/GigaChat/OpenRouter integrations

📱 Telegram/VK Automation — bots, content pipelines, 24/7 services

Selected Projects (9 commercial)

1. DeFi One — AI Portfolio Manager

AI-driven DeFi dashboard: connect wallet → AI analyzes positions → strategies → unsigned transactions.

Stack: React 19 + TypeScript, FastAPI, Web3Modal/WalletConnect, Mistral AI, Lido/Aave/1inch/Uniswap.

2. AIRealty — AI Copilot for Real Estate

AI broker with Property DNA (47 parameters, 7 categories): location, condition, infrastructure, legal risk, market dynamics, financials. Paste a listing → get BUY/WATCH/PASS verdict.

Production v4.0, 15 API endpoints. Stack: React, FastAPI, Mistral AI, Monte Carlo.

3. AIBiz — AI Copilot for Deal Intelligence

DealDNA scoring (48 parameters, 6 categories), pipeline forecasting, automated due diligence.

Production v4.0, 15 API endpoints. Stack: React, FastAPI, Mistral AI, Recharts.

4. AILegal — AI Copilot for Legal Documents

ClauseDNA risk scoring (50+ clause types, severity levels), compliance scanning, contract intelligence.

Production v4.0, 18 API endpoints. Stack: React, FastAPI, Mistral AI, Framer Motion.

5. On-Chain AI Agent Framework

Autonomous agents with wallets: analyze market, execute transactions 24/7.

3 smart contracts (Ricardian Agreement, Agent Registry ERC-8004, Escrow), FastAPI, Docker.

6. Solidity Portfolio — 14 contracts

ERC-20, NFT, Staking, DAO, RWA Tokenization, ZK Privacy, Cross-Chain Bridge, Vault, Escrow,

Invoice, Payment, SupplyChain, Airdrop, Token-Bound Account. ^0.8.24, custom errors, NatSpec.

Stack: Solidity, Hardhat, Foundry, OpenZeppelin.

7. Telegram AI Bot (RAG)

Enterprise document Q&A: upload PDFs, get instant answers. RAG with ChromaDB vector search.

Stack: Python, FastAPI, aiogram 3.x, Mistral AI, ChromaDB.

8. RAG Corp Bot

Corporate bot with hybrid search (vector + BM25 + LLM): chat with company docs, AI answers.

Stack: FastAPI, ChromaDB, Mistral AI.

9. Crypto MCP Server

14 crypto API tools: prices, gas, DeFi yields, technical analysis. MCP protocol.

Stack: Python, CoinGecko, DeFiLlama.

Stack

Node.js Python FastAPI Go React Next.js TypeScript Solidity Rust PostgreSQL MongoDB

Docker Linux Web3.js Ethers.js Web3.py Hardhat Foundry

Why Me?

 Fast delivery – AI-assisted workflow, senior quality, tested, documented

 Full transparency – code access from Day 1

 Production-grade – I don't ship junk

 Market-smart – RWA, DeFi, AI automation, micro-SaaS – I build what works now

I Build

 RWA Tokenization & Asset Tokenization

 DeFi Protocols & Token Launchpads

 AI Agents & Automation Systems

 SaaS Copilots (Real Estate / Deals / Legal)

 Telegram/VK Bots & Content Pipelines

 Crypto Payment Gateways

 Customer Portals & CRMs

How It Works

1. Discovery – 1-2 hours of planning

2. AI-assisted development – parallel agents write + test, I review to senior standards

3. Launch – transparent reporting, delivery on time

Let's Go

 Full project build

 MVP in 7 days

 Speed up your existing product

 AI integration

Fixed-price scope. Transparent. No surprises.

"What takes a team a month, I ship by Friday."
