

Maxim — AI-Powered Developer

Email: maxim.pkk@gmail.com • **Telegram:** @mrpkk • **GitHub:** github.com/mrpkk

About Me

AI-Powered Developer building custom applications at unprecedented speed. I leverage cutting-edge AI agents to deliver mid-level+ to senior-quality code in hours — work that would traditionally take other developers weeks.

The Speed & Cost Advantage

1 hour of my AI-assisted development = 1 week of traditional coding.

I don't just use AI as a helper — I orchestrate multiple AI agents that write, test, and optimize production-ready code simultaneously. What takes a team of 3 developers a month, I deliver in 3-5 days.

Metric	My Delivery	Traditional
MVP	3-7 days	4-8 weeks
Full SaaS	2-4 weeks	3-6 months
Smart Contract	1-2 days	2-3 weeks
Cost	Up to 70% less	Full price

Quality guaranteed: All code is reviewed, tested, and optimized to senior developer standards — clean architecture, proper error handling, security best practices, and full documentation.

Core Competencies

Tech Stack

- **Backend:** Node.js, Python, FastAPI, Django, Go, PostgreSQL, MongoDB
- **Frontend:** React, Next.js, Vue.js, TypeScript, Tailwind
- **Blockchain:** Solidity, Rust (Solana), Web3.js, Ethers.js
- **Automation:** Selenium, Puppeteer, custom AI agents

Development Process

1. **Discovery** (1-2 hours) — requirements + architecture planning
2. **AI Agent Orchestration** — multiple agents work in parallel (architecture, coding, testing)

3. **Human Review** — every line reviewed, refactored, senior-level quality

Applications I Build

Project Type	Delivery	Traditional	Savings
AI Aggregator for Freelancers	5-7 days	4-6 weeks	Up to 70%
Decentralized Freelance Platform (Web3)	2-3 weeks	2-3 months	Up to 70%
SaaS for Service Professionals	7-10 days	6-8 weeks	Up to 70%
Token Launchpad with Bonding Curves	3-5 days	3-4 weeks	Up to 70%
DeFi Protocol (Staking/Yield Farming)	1-2 weeks	1.5-2 months	Up to 70%
AI Auto-Bidding System	5-7 days	5-6 weeks	Up to 70%
Crypto Payment Gateway	3-5 days	3-4 weeks	Up to 70%
AI Proposal Generator	3-5 days	4-5 weeks	Up to 70%
Review Management SaaS	5-7 days	5-6 weeks	Up to 70%
Customer Portal for Agencies	4-6 days	4-5 weeks	Up to 70%

Case Studies

- **DeFi Staking Protocol** — Advanced smart contract with optimized gas consumption
 - **AI Aggregator for Freelancers** — Scraper system with intelligent filtering and profile-matching
 - **Token Launchpad** — Production-ready bonding curve framework for instant token deployment
 - **SaaS for Tutors** — End-to-end CRM with scheduling, calendars, and payment modules
-

Why Work With Me

- **10x faster** — AI agent orchestration delivers weeks of work in days
 - **Up to 70% cheaper** — AI does the heavy lifting, I ensure quality
 - **Senior quality** — Clean, maintainable, production-grade code
 - **Full transparency** — Codebase access from day 1, weekly demos, no black boxes
 - **Market-aware** — Building what's trending (AI automation, Web3, micro-SaaS)
-

Pricing

Fixed-price projects — Transparent quotes based on scope with up to 70% savings.

Availability

- Full project development — Senior-quality code in record time
- MVP in 7 days — Validate before investing months
- Existing product acceleration — Features at 10x speed
- AI integration — Supercharge your workflow
