What I Do

I build production-ready apps in days, not months — using an AI-assisted development workflow.

Solidity smart contracts, DeFi protocols, RWA tokenization, AI agents, Telegram bots, SaaS.

Core Focus (2026)

🏠 RWA Tokenization — real estate & asset tokenization (AIRealty, Solidity RWA contracts)

🔗 DeFi & Smart Contracts — ERC-20/721/1155/4626/6551, Staking, DAO, Escrow, Bridges

🤖 AI Agents & LLM Systems — autonomous agents, RAG, Mistral/GigaChat/OpenRouter integrations

📱 Telegram/VK Automation — bots, content pipelines, 24/7 services

Selected Projects

1. DeFi One — AI Portfolio Manager

AI-driven DeFi dashboard: connect wallet → AI analyzes positions → strategies → unsigned transactions.

Stack: React 19 + TypeScript, FastAPI, Web3Modal/WalletConnect, Mistral AI, Lido/Aave/1inch/Uniswap.

2. AIRealty — AI Property Broker

AI broker for real estate with 47-parameter Property DNA model, RWA tokenization concept.

Stack: React, FastAPI, Mistral AI, Monte Carlo simulation.

3. On-Chain AI Agent Framework

Autonomous agents with wallets: analyze market, execute transactions 24/7.

3 smart contracts (Ricardian Agreement, Agent Registry ERC-8004, Escrow), FastAPI, Docker.

4. Solidity Portfolio — 14 contracts

ERC-20, NFT, Staking, DAO, RWA Tokenization, ZK Privacy, Cross-Chain Bridge, Vault, Escrow,

Invoice, Payment, SupplyChain, Airdrop, Token-Bound Account. ^0.8.24, custom errors, NatSpec.

Stack: Solidity, Hardhat, Foundry, OpenZeppelin.

5. RAG Corp Bot

Corporate bot with hybrid search (vector + BM25 + LLM): chat with company docs, AI answers.

Stack: FastAPI, ChromaDB, Mistral AI.

6. Crypto MCP Server

14 crypto API tools: prices, gas, DeFi yields, technical analysis. MCP protocol.

Stack: Python, CoinGecko, DeFiLlama.

7. Nivritti — Vedic Media System

5 Telegram + 5 VK channels, AI content, muhurta-aware scheduler. Runs 24/7 as systemd service.

Stack

Node.js Python FastAPI Go React Next.js TypeScript Solidity Rust PostgreSQL MongoDB

Docker Linux Web3.js Ethers.js Web3.py Hardhat Foundry

Why Me?

🚀 Fast delivery — AI-assisted workflow, senior quality, tested, documented

- 💰 Transparent pricing – fixed price, you pay for results
- 🎯 Production-grade – I don't ship junk
- 🔧 Full transparency – code access from Day 1
- 📦 Market-smart – RWA, DeFi, AI automation, micro-SaaS – I build what works now

I Build

- ✅ RWA Tokenization & Asset Tokenization
- ✅ DeFi Protocols & Token Launchpads
- ✅ AI Agents & Automation Systems
- ✅ SaaS for Service Professionals
- ✅ Telegram/VK Bots & Content Pipelines
- ✅ Crypto Payment Gateways
- ✅ Customer Portals & CRMs

Rates (USD)

MVP: \$2,000–5,000 (3–7 days)
Full SaaS: \$5,000–15,000 (2–4 weeks)
Smart Contract: \$800–2,000 (1–2 days)
DeFi Protocol: \$3,000–8,000 (1–2 weeks)
AI Agent / RAG System: \$1,500–4,000
Payment: USDT / USDC / ETH preferred, PayPal available

How It Works

1. Discovery – 1–2 hours of planning
2. AI-assisted development – parallel agents write + test, I review to senior standards
3. Launch – transparent reporting, delivery on time

Let's Go

- 💻 Full project build
- 🚀 MVP in 7 days
- 🔧 Speed up your existing product
- 🤖 AI integration

Fixed-price. Transparent. No surprises.

"What takes a team a month, I ship by Friday."
